Professional Summary

Aspiring developer with hands-on experience in **SQL, database management, and data handling**. Strong foundation in query writing and database fundamentals, with exposure to application workflows. Possesses **foundational knowledge of .NET and C#** and demonstrates strong programming logic with the ability to quickly adapt to enterprise development environments.

Technical Skills

- **Programming Languages:** C#
- **Frameworks & Technologies:** ASP.NETMVC, ASP.NETCore.
- **Database:** MySQL, SQL
- **Tools:** GitHub, VS Code, MySQL Workbench

Education

Ajeenkya DY Patil School of Engineering, Pune	2021 – 2025
B.E - Artificial Intelligence and Data Science	CGPA: 6.96 / 10
HPT Arts RYK Science College, Nashik	2021
12th - Maharashtra State Board	Percentage: 78.83%
Holy Cross English High School, Chhatrapati Sambhajinagar	2019
10th - Maharashtra State Board	Percentage: 90.8%

Experience

Software Developer Intern SoftwareEra Technologies, Pune	Dec 2025 – Mar 2026
• Performed SQL-based database operations, including data insertion, retrieval, and manipulation for backend processes. • Designed and executed structured queries to support application workflows and ensure data consistency. • Strengthened understanding of data handling, validation, and backend logic in application development. • Possess foundational knowledge of C# and .NET, with the ability to apply backend concepts to enterprise environments.	

Projects

Bank Management System (SQL + C# .NET)

- Built a **database-driven banking application** using **SQL** and **C# .NET** for backend processing.
- Implemented core functionalities such as **Account Creation, Deposit, Withdrawal, and Balance Inquiry**.
- Designed and executed **SQL queries** for efficient **data storage, retrieval, and transaction handling**.
- Developed structured modules for managing **customer data** and **banking operations**.
- Ensured **data validation** and **consistency** across all system operations.

Parking Lot Management System (SQL + C# .NET)

- Built a **parking management system** for **vehicle registration** and **slot allocation** using **C# .NET**.
- Implemented **unique vehicle ID generation** and efficient **tracking mechanisms**.
- Designed and managed **structured data storage** using **SQL** for organized record handling.
- Developed modules for **parking slot management** and **vehicle entry/exit tracking**.
- Ensured **data validation** and smooth **user interaction flow** within the system

Certifications

- **C# and .NET Fundamentals** – Exponent IT Training and Services, Pune
- **SQL** – Exponent IT Training and Services, Pune
- **Generative AI and Prompt Engineering** – Udemy
